

Environmental Policy

Poly Welding Specialists has committed to, maintain and continually improve upon an effective Environmental Management System that meets and exceeds the AS/NZS ISO 14001:2004 standard.

Poly Welding Specialists are committed to reducing the direct environmental impacts of their operations and the ways that activities are conducted ensuring and communicating best environmental practices throughout our industry and associated industries.

Poly Welding Specialists has implemented a comprehensive integrated environmental management system tailored specifically to address their environmental aspects and impacts.

Poly Welding Specialists shall regularly review the EMS regularly to follow a path of continual improvement in their environmental performance.

Poly Welding Specialists has placed particular emphasis on waste minimisation projects, non renewable energy and water resources consumption, and recycling capabilities. All of which they have control over.

The dedicated staff and the engagement of external consultants shall help with the achievements of targets and timelines.

All Regulative and Legislative requirements will be met if not exceeded so as to benchmark environmental practices and give credibility to this large organisation.

Poly Welding Specialists has instilled through everyone being fully committed and taking ownership for the impacts of their daily duties.

The Directors and staff are fully committed to the maintenance, review and improvement of the Poly Welding Specialists Environmental Management System.
